PROFESSIONAL SUMMARY

Total 9+ years of experience as an IT professional with experience in Enterprise Application Integration (TIBCO). Expertise in Understanding functionality in Integration Administration. Expertise in Hands-On and detailed exposure to level 3 production support activities including monitoring, scheduling, problem, and incident management, And have good experience in AWS cloud platform, and Apache Kafka & TCI(Tibco Cloud Integration) Zeal to accept work related challenges, dedication towards work. Excellent understanding of project issues, ability to work independently or as a part of a team and Involved in **RFB**(Request for Bid) projects for Tibco infra related activities.

TIBCO Experience:

- Strong experience in TIBCO Active Enterprise Suite infra activities- TIBCO BW5.x, BW6.x, BWCE2.x EMS, Hawk, Administrator, TEA.
- TIBCO EMS administration having 8+ years of experience including the activities like Installation/Configuration/Troubleshooting.
- Involved in Installing and Configuring of, TIBCO suite of products like, TIBCO Active-Matrix Business Works 6.x, Business works 5.x & Tibco admin/TEA setup
- Have a good knowledge of TIBCO Spotfire.
- Experience in deployment and monitoring of TIBCO projects and troubleshooting errors.
- Attending CAB meeting to get the CRQ approval and implementing by co ordinating with multiple technical teams.
- As a TIBCO admin, involved in supporting and leading the weekend activities like, NAS migration, certificate Migration, firmware upgrade, OS patching, SOX, DG migration, DR etc.
- knowledge on configuring persistence modes, TEA and BW agents.
- Experienced in TIBCO Software installation and upgrade of TIBCO products in Linux/UNIX/Windows servers.
- Hands on experience in setup TIBCO in completely new environment (staging) and deploy the Applications.
- Experience in TIBCO EMS/JMS - installing the EMS, creating Queues, Topics, User's and Roles & configuring various EMS options.
- Experience in deployment and monitoring of TIBCO projects and troubleshooting errors.
- Good Experience using Apache Kafka, integrated with Tibco and communicated with multiple systems.
- Basic knowledge on other tools like njams, TIBCO MDM, SAP PI, Jenkins,GIT,AWS admin, Rabbit MQ, Apache Kafka, Portainer, Nexus, ELK(Elasticsearch,Logstash,Kibana).

EDUCATION

Bachelor of Engineering (B.E: Electronics and Communication
Visvesvaraya Technological University - I, India

CERTIFICATIONS

TCA- TIBCO MESSAGING
TCA- TIBCO SPOTFIRE
TCA- TIBCO BUSINESS WORKS
AWS CLOUD PRACTITIONER

SKILLS

- **TIBCO Suite of Products:** TIBCO BW5.x, BW6.x, BWCE, EMS, Admin, Hawk, TCI(Tibco cloud integration), Adapters, TCM(Tibco cloud messaging), TIBCO MDM
- **Ticketing Tools:** ServiceNow, JIRA, BMC Remedy.
- **Tools:** ELK, Git hub/Lab, Jenkins, Gitlab, Radar, Kafka, Jfrog, Apache Kafka, Rabbit MQ, Nexus, Portainer, OpenShift container, AWS Admin, Njams
- **CI/CD Tools:** Jenkins, GIT.
- **Database:** Oracle 11.2g.
- **Platforms:** Windows, UNIX, Linux.

PROJECTS

1) Sanofi:

Sanofi S.A. is a French multinational pharmaceutical company headquartered in Gentilly, France, as of 2024 the world's fifth-largest by prescription sales. Sanofi engages in the research and development, manufacturing and marketing of pharmaceutical drugs principally in the prescription market, but the firm also develops over the counter medication.

Project Description:

The Metropolitan Atlanta Rapid Transit Authority (MARTA) is the principal public transport operator in the Atlanta metropolitan area.

This project is to Maintain and process the data for MARTA Train/Buses Routes, Arrivals, Departures, Signboards, Delays, stop monitoring, Vehicle monitoring, Alerts and so on.

The Scope of the project is to get the required data from different APIs, store the data into database, process it based on the requirement and publish to the end systems.

Roles and Responsibilities:

- Involved in the meetings with Business line team for translating business requirements into functional specifications.
- Have managed the Lead role as coordinating with multiple systems as middleware point of contact.
- Involved in requirement gathering and in design phase meetings.
- Involved in manual monitoring, support for Hybrid Agent, deployment, hybrid agent

- restart, fluentD restart for TCI(Tibco Cloud Integration)
- Performance tuning, troubleshooting, Software installation, upgrade and post installation configuration, prepare monitoring steps, User management in TCI.
- Involved in monitoring and configuring the queues/Topics in **TCM**(Tibco Cloud Messaging).
- Involved in user creation/deletion and assigning the roles in **TCI**.
- Systems maintenance and L3 Support in 24*7 model and providing weekend on call support.
- Involved in creating of TIBCO Hawk rules.
- Involved in TIBCO EMS administration activities like creating/deleting queues, topics,user monitoring destinations and store files and compact those.
- Involved in resolving the infrastructure issues in production and non-production environments.
- Worked in resolving tickets as per Incident, Change, Problem management processes.
- Worked on deployment over TEA GUI and BW-Admin for BW 6.X.
- Attending CAB meeting to get the CRQ approval and implementing by co ordinating with multiple teams.
- Involved in multi weekend activities like OS patching, NAS migration, Certificate Migration ,SOX etc.
- Involved in Building/Recreating Appspace and Appnode depending upon the requirement.
- Involved in raising a case and working with vendor(TIBCO) support for issues.
- Knowledge on LDAP configuration like Add/Remove Roles for TIBCO
- Involved in creation of Domains/Appspace/Appnodes.
- Involved in monitoring **Kafka** clusters and services like Broker, Zookeeper,
- Involved in creating the Kafka topics based on the request.
- Involved in troubleshooting of **Kafka** services during the connection breakdown as a part infra support.
- Involved in monitoring the PODS and services in OpenShift containers and portainer.

2) SYMANTEC:

Project Description:

Symantec helps consumers and organizations secure and manage their information-driven world against more risks at more points, more completely and efficiently than any other company.

Symantec provides security, storage and systems management solutions to help its customers – from consumers and small businesses to the largest global organizations.

Roles and Responsibilities:

- Requirement Gathering and providing the infra support.
- Systems maintenance and Support in 24*7 model and providing weekend on call support.
- Worked on Hawk Rule bases monitoring the EAI interfaces , Alerts.
- Building/Installation TIBCO environment with latest products.
- Involved in resolving the infrastructure issues in production and non-production environments.
- Involved in resolving the tickets as per Incident, Change, Problem management processes.
- Administration of TIBCO BW, HAWK,EMS, Administrator.

- Checking the health of servers, Deployed instance on daily in Tibco Admin.
- Monitoring and performing health check of components.
- Validate Applications by using Splunk logs and ELK.
- Production support for Application deployment and Validate & Support
- Coordinate with Client and other teams for further technical enhancements.
- Involved in performing backups and restoring the components.
- Involved in performing the application/service restart during the activities like DR migration, NAS migration, OS Patching etc.

3) TIBCO Loyalty Lab:

Project Description:

TIBCO Loyalty Lab® is a leading provider of loyalty platform technology and services to marketers worldwide.

In this the Transaction data will be transmitted to SFTP side on a certain frequency from PublishToCustomer LLApi System.

LoyaltyLABAPI will pick up files and process the records, these records will be publishing to ESB, These messages further bridged out to two separate queues for further processing. Engage Event Publisher interface will pick of the copy of the message and convert into an engage transaction data model and invoke Loyalty APIs to publish the data into platform.

Roles and Responsibilities:

- Designed and developed the process flows using various activities that needs transformation mapping in Business Works.
- Configure Message services JMS for creating Bridge, Topic, Queue and setter properties.
- Worked extensively on TIBCO Business Works palettes like Data format, JDBC and General
- Extensively worked in XML related technologies that include XML, XSD.
- Created various XSD, X-Path transformations.
- Used XPath extensively to map the fields as per the mapping documents
- Created EAR for the process and deployed them using the TIBCO Administrator and verified those working correctly.
